

# Modeli galaktičke nastanjivosti

Branislav Vukotić  
Astronomska opservatorija u Beogradu  
bvukotic@aob.rs

Seminar Katedre za astronomiju

10.03.2015.

# Nastanljivost

×  
10<sup>6</sup> !!!

# Bitno za nastanjivost

## Zvezdani sistem:

- Višestrukost
- Masa zvezde
- Broj i položaji planeta
- Stabilnost orbita
- Mase i sastav planeta
- Skupine malih tela
- Interakcija sa drugim sistemima, razmena materijala

## Galaksija:

- Metaličnost
- Gustina
- Zračenja
- Mešanje populacija

# Zašto da modeliramo baš to?

Izgleda da je važno!

# Kosmološka paralela

Početak  $\xrightarrow[\text{kontinuitet}]{\text{evolucija}}$  Seminar 10 mart 2015, kao sasvim običan seminar bilo  
gde u svemiru.

# Kontinuitet

This common element, which I will coin “the continuity thesis”, is the assumption that there is no unbridgable gap between inorganic matter and living systems, and that *under suitable physical conditions the emergence of life is highly probable*. It is the adoption of the “continuity thesis”, concerning the philosophical dimension of life-matter relationship, which has turned the origin of life into a legitimate scientific question, and which constitutes a necessary condition for any scientific research in this domain.

# Ništa posebno, mada tako ne izgleda.

Created by Shana Priwer

GEOCENTRIC MODEL

HELIOCENTRIC MODEL

# Idila...

# Idila...?

# Uticaj neočekivanog

Small amplitude in deep ocean

Large amplitude in shallow water

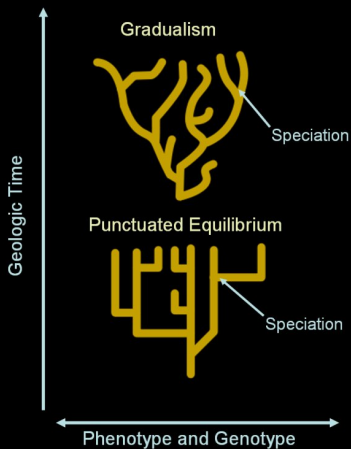

# Obrenovac, maj 2014.

Analitički → Katastrofa.

Katastrofa Monte Carlo simulacije → Katastrofizam

# Punctuated equilibrium

## Theory of Punctuated Equilibrium

# Postepena ekstinkcija?

## Signor-Lipps Effect

# Šta se dogodilo pre $\sim 65$ Myr?

# Katastrofični događaji na galaktičkoj skali

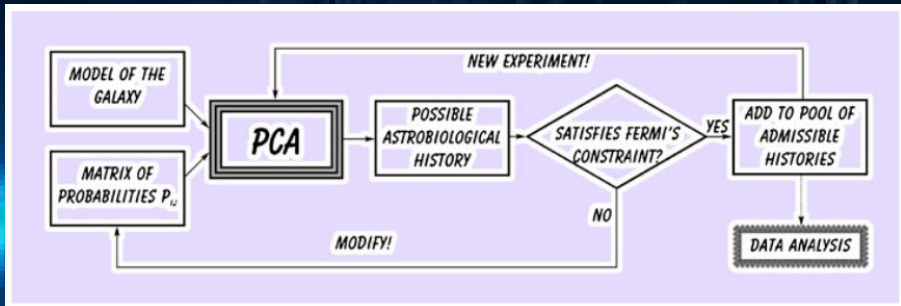

## Funkcija globalnog rizika

### 2704 BATSE Gamma-Ray Bursts

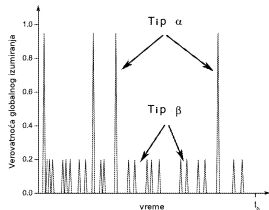

- $\gamma$ -bleskovi:
  - Annis J, 1999, JBIS, 52, 19.
  - Scalo, J., Wheeler, J.C., 2002, ApJ, 566, 723.
  - Thomas, B.C. et al, 2005, ApJ, 634, 509.
- Supernove
- Sudari zvezda

# Način modeliranja

# 1D model: Primer korelisanja vremenske skale

# Veoma kraaaaaaatak uvod u EĆA

Uređena četvorka:  $\{G, S, N, F\}$

$$f : S^{2r+1} \rightarrow S,$$

$$|F| = m^{m^{2r+1}}.$$

$$s_i^{(t)} = F(s_{i-r}^{(t-1)}, s_{i-r+1}^{(t-1)}, \dots, s_{i+r-1}^{(t-1)}, s_{i+r}^{(t-1)}).$$

$$s_i^{(t)} = F(s_{i-r}^{(t-1)}, s_{i-r+1}^{(t-1)}, \dots, s_{i+r-1}^{(t-1)}, s_{i+r}^{(t-1)}, \\ s_{i-r}^{(t-2)}, s_{i-r+1}^{(t-2)}, \dots, s_{i+r-1}^{(t-2)}, s_{i+r}^{(t-2)},$$

$$\vdots$$

$$s_{i-r}^{(t-n+1)}, s_{i-r+1}^{(t-n+1)}, \dots, s_{i+r-1}^{(t-n+1)}, s_{i+r}^{(t-n+1)}, \\ s_{i-r}^{(t-n)}, s_{i-r+1}^{(t-n)}, \dots, s_{i+r-1}^{(t-n)}, s_{i+r}^{(t-n)}.$$
